Building a Wetland in One Day by Hand that will require No Maintenance

- 8:00 am Meet at SLV Charter School (325 Marion Ave, Ben Lomond, CA).
Intro to Amphibian Conservation, SAVE THE FROGS! & Wetland Restoration
Safety discussion
Use shovels to remove and save desirable plants and topsoil
Prepare the depression for the liner using shovels and rakes
- 12:00 pm Lunch in the field while construction is taking place (please bring a bag lunch)
- 12:30 pm Wetland construction continues
Installing the aquatic safe liner and geo-textile pads
Covering the liner with soil
Restoring natural topography
Returning topsoil
Benefits of rough grading
Large and small woody debris placement
Establishing native plant species and controlling nonnative species
- 4:30 pm Adjourn

We welcome your help building this wetland by hand. Please bring a shovel, rake, and gloves with you if you are driving and are willing to assist with this project.
